MANITOBA

CANADA

Producing the World's Finest Dairy Genetics

Manitoba Agriculture and Food

MANITOBA-

the centre for superior dairy genetics

Manitoba, located near the centre of North America, has a small but vibrant and progressive dairy industry, which produces some of the world's best dairy genetics.

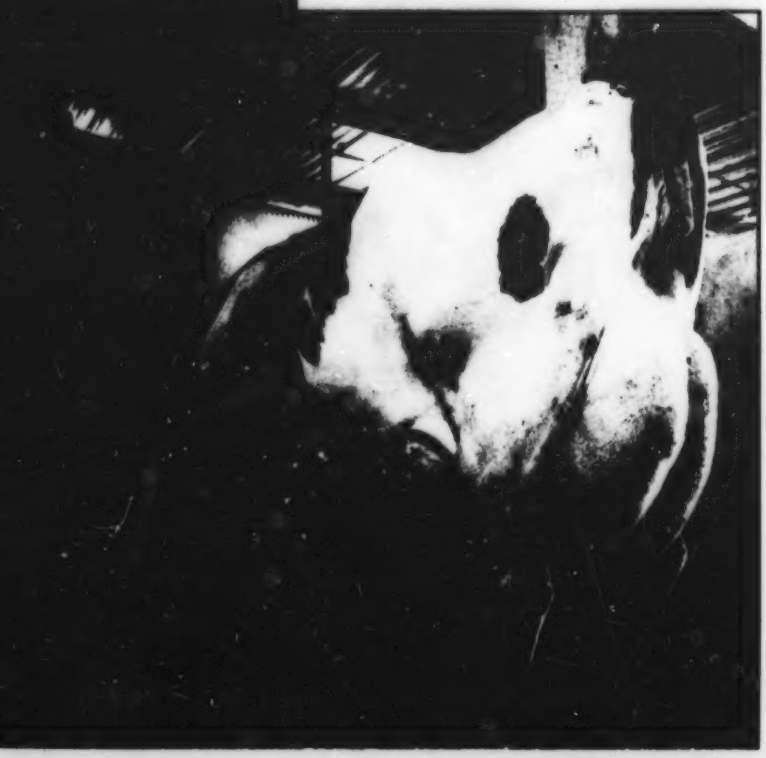
Manitoba's 630 dairy producers have used good breeding and management practices and a solid balanced breeding approach to develop the Canadian dairy cow into an efficient and productive animal. Manitoba's dairy producers are capable and willing to share their superior dairy genetics with other producers worldwide.

Close to world dairy markets

Manitoba is within a day's drive of major US dairy production areas, making genetic searches and animal transportation by truck very easy.

Winnipeg's modern, expanding airport is able to service visitors and fly genetic materials worldwide.

Manitoba dairy cattle have an excellent health status and are exportable worldwide.



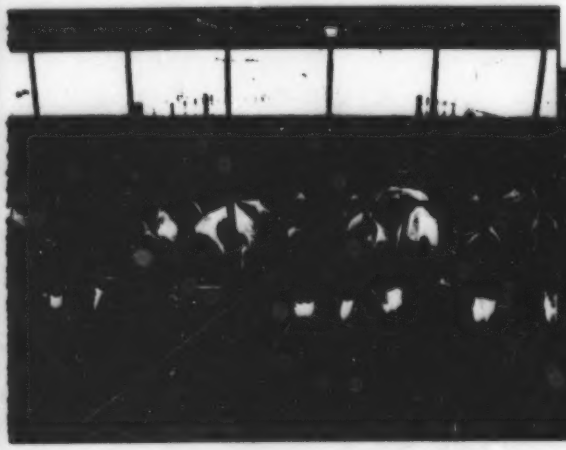
Manitoba's health standards second to none

- Rigorous testing by veterinarians maintain a brucellosis and TB-free status
- Many herds have prevention and control measures for leucosis and Johne's Disease
- Manitoba cattle and genetics are generally exportable worldwide

102-01874/

Balanced Breeding approach works

- **Equal attention to functional type and production traits leads to dairy cattle that produce profitably for a long time.**
- **Important type traits such as size, strength, capacity, dairyness, good feet and legs, and well-supported udders combined with high production makes an efficient, productive animal.**

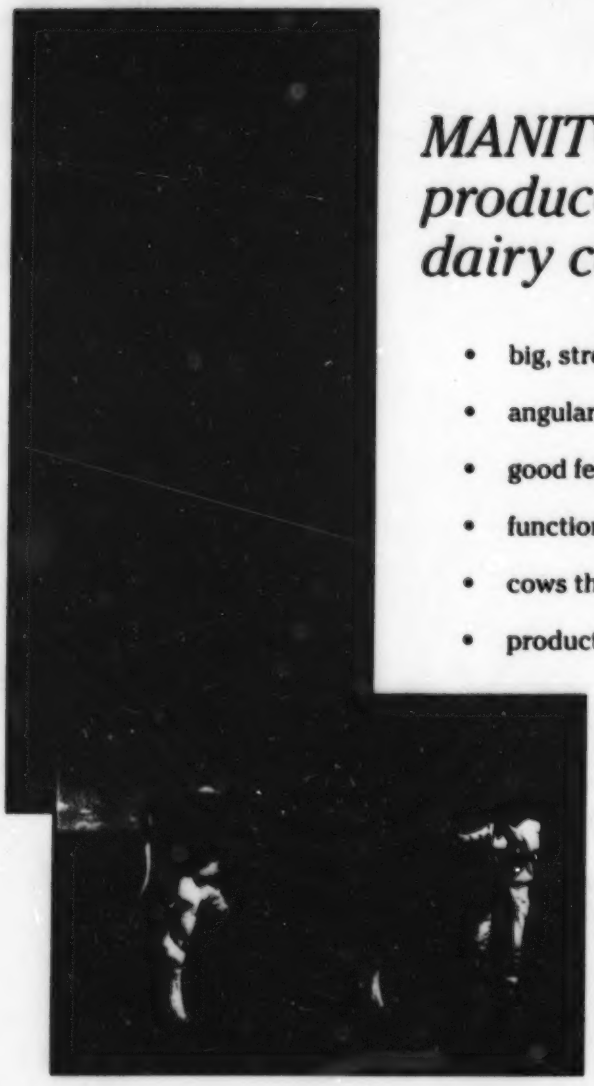


Quality Manitoba forages and proven genetics – a formula for profit.

MANITOBA dairy producers use modern tools for breed improvement

- **Artificial insemination (A.I.) - over 85% of dairy cows and 65% of heifers are bred by A.I.**
- **Over 62% of all Manitoba diary herds are enrolled on milk recording (DHI)**
- **Over 50% of all herds are breed association members**
- **Many herds classify all cows**
- **Many breeders show cattle locally and away**
- **Producers use modern management and technology**

When looking for top quality dairy cattle look no further than Manitoba.



MANITOBA produces superior dairy cattle

- big, strong, and capacious
- angular, clean and dairy
- good feet and legs
- functional, correct mammary system
- cows that work hard and long
- productive and efficient

Manitoba offers the superior dairy genetics to make your herds stronger.

Please call us to discuss the details.
